

Why ONLY Choose IBM?

There are so many reasons to purchase IBM - LOWER COST OF OWNERSHIP is the best reason. Did you know that only %30 of the cost of owning a computer comes from its purchase price... More cost of a personal computer or notebook actually comes from repairs on them, IBM spends millions of dollars each year to make sure their product is best of breed. All IBM / Lenovo computers come installed with hard drive air bag protection, every notebook has troubles with its hard drive over time, because it is always on the move and to solve this, they put a sensor in the laptop to stop the drive from spinning when ever there is motion detected this protects the drive. They put space around the screen so that the keyboard never touches the screen, making it look better longer.

IBM makes all the products already in your home...
